RE: Final Proposed Plan for Camp Forsyth Landfill Area 2, Operable Unit 009 (OU-009)
Fort Riley, Kansas

The Kansas Department of Health and Environment/Bureau of Environmental Remediation (KDHE/BER) completed its review of the above referenced document and provides approval for the Final Proposed Plan – Camp Forsyth Landfill Area 2, Operable Unit 009 (OU-009). KDHE finds the proposed remedial option of clearance of munitions of environmental concern (MEC) from the selected areas of the Republican River and Breakneck Creek with the Land Use Controls to be appropriate based on available information and data. If new information should become available, KDHE will request that further evaluation be conducted.

If you have any questions, please call me at (785) 296-8801 or email margaret.townsend@ks.gov.

Sincerely,

A handwritten signature in cursive script that reads "Margaret Townsend".

Margaret Townsend, PG
Unit Chief, Federal Facilities
