Aspergillus
Pedigree sheets,
in case missing
#550 not listed: reason?
→ got or not?

FABRICATION CANADIENNE

MADE IN CANADA

MEMO

TO: Dr. Etta Kafer-Boothroyd

FROM: Ruth Rimbey

RE: Shipping labels

Enclosed, please find the labels which I promised to send when I returned. Thanks for sending your completed deposition sheets which had arrived before I got back.

Trust you enjoyed the Conference as much I did and had a safe trip back to Canada.

I enjoyed my time with my family and hope I don't wait so long to return for a visit with them next time. The Grandchildren grow too fast.

Under separate cover I am mailing you Xerox copies of the Aspergillus deposition sheets from FGSC#523 to #560. I have not located a silica sample with #514 R but do have the #550 - reason for not listing was no information on the deposition sheet.
