Dr. William Ogata  
Humbolt State University Foundation  
Fungal Genetics Stock Center  
Arzata, CA. 95521

Dear Bill,

Thank you for waiting for the strains of Aspergillus nidulans to be included in the Fungal Genetic Stock Center.

We have checked the enclosed strains out and they respond as per genotype previously cited. As you can see from the enclosed tubes they are all green and do not have any fluffy phenotype. If you care to repeat our growth tests; enclosed are some silica gel stock cultures for you of the same strains.

Hoping these strains are acceptable; please let me know how they work out and what your future plans are for the stock center.

Best wishes,

Barry R. Scott, Ph.D.
