Nov. 14, 2000

Hi Kevin,

I am sending you here the three strains promised earlier, 2 bimD6 strains which are the parents of all our strains, some of them shown in detail in the publication, submitted Nov. 3, 2000. the other is the best bimB3 strain Greg May agreed to deposit at the same time.

Please let me know soon what their FGSC numbers are going to be, so that we can add it in the publication during revision. I shall make the pedigree sheets soon, probably not next weekend (I shall be off the rest of this week) but the one after that, and it would be nice to have the numbers by then.

Many thanks and best wishes,
and possibly au revoir at Asilomar,

Dita Kafer
