September 16th 2007

Dear Kevin,

Please find attached sterile paper disks containing the *A. fumigatus* mutant Afu3g08990 D1 recently described in:

Levdansky E, Romano J, Shadkchan Y, Sharon H, Verstrepen KJ, Fink GR, Osherov

N. Coding tandem repeats generate diversity in *Aspergillus fumigatus* genes.

Eukaryot Cell. 2007 Aug;6(8):1380-91.

It was prepared by hygromycin mediated gene deletion using the AF293 strain.

Thanks!

Nir Osherov
