Dear Sir,

Please find enclosed some *Aspergillus nidulans* strains we wish to deposit in your collection. They are growing on agar. All alcA(p) strains are on AMM agar containing glycerol and threonine, others are on Aspergillus complete media, all are supplemented with the necessary requirements.

I am attaching a spread sheet with the information of all the strains. I hope this is acceptable and that all the relevant information is included on the sheet. Please let me know if any vital information is missing, and if there are any problems with any of the strains.

Thank you,

Mrs J. Price
