Subject: A. flavus strain CA14 Δ ku70 Δ pyrG

Dear Dr. Chang,

I would like to request that you deposit the A. flavus strain CA14 Δ ku70 Δ pyrG into the FGSC collection.

I believe that this strain was described in Fungal Genetics and Biology Volume 46, Issue 2, February 2009.

This strain will be very important for people working with aspergillus and it is important that it be available from a repository.

If you would like to consider depositing additional strains, for example, a precursor of CA14 Δ ku70 Δ pyrG, that would be welcome.

Thank you for considering this request.
