Dear Ray:

The stock you ask about (F.G.S.C. #313) was obtained after only one cross to a St. Lawrence wild type. For as complete information as I have I'm also sending the accompanying pedigree, since further back in its ancestry there may have been crosses involving St. Lawrence strains again. al-2 arg-6 23 a, the immediate parent of F.G.S.C. #313, was not compatible with St. Lawrence wild type; and if I'm not mistaken this is the stock you carry as F.G.S.C. #272 - although only Dave will know for sure if that is so.

We are indeed looking forward to the summer at Stanford. Is there any chance we'll see you there?

Best regards,

Ed

Edward G. Barry
