Comments: Responds to methimines (over)  
very, very leaky see 922 for opposite mit  
liquid 6" test showed no difference from min. to max

317-X received fr. H.L. MacLeod as oncoprotein isolate from 35599A X 8a. This culture tested for HLA & character - both OK. 9/30/62 probably not me - see Genetics Abstr. MacLeod meeting and auto letter, 9/24/69. (RWB)
