Comments:

grows on min. OK 11/30/60

2/13/83

phone call from Ann Barr - with Howard Mason at Oregon Health Science Univ. She was unable to detect tyrosinase activity in 321, although 2963 was fine. When our 321 (S.G. and 1g0) were checked along with 2963, 321 S.G. showed no activity. New S.G. was made from the seemingly good 1g0

See Katan and Galun (1975) for purification procedure also: Horowitz, Fling and Horn 1970 Meth. Enzymol. 17: 615-620
