FGSC:

14 Feb 82

The stocks of FGSC #482 received from FGSC in May 1982 as tuft proves to be pro-3 (= arg-8) by requirement and linkage (3% to ind in VR). I find that an arg-8 stock was assigned #482 (our copy of 1/10/61 deposit sheet, enclosed), and this sheet is overwritten "to be replaced by L-tuft-4 EKT".

Apparently the same number was assigned to both arg-8 and tu, and you have ~~both~~ stocks of both so numbered, and sent us the earlier (arg-8) stock. I hope that you also have tuft preserved.

If you succeed in clarifying this, I'd appreciate receiving a transfer of bona fide tuft!
