liquid test - responds well to ppv (40A) 3/1/62 -
 Comments: "weak heterocaryons with KS-36 & KS-43 (and ppv-3d). Negative complementation with KS-7, KS-8, & KS-305, but positive with all others tested. It has not been located within the ppv-3 region, but shows extremely slow linkage to some ppv-3 mutants and not others. (It has been a pain)" V. Woodward
