New York, N. Y. 10016

Dear Dr. Bachmann

I would like to submit the following information for the revised stock list of Neurospora:

(1) The phenylalanine requiring mutants phen-2(E5212) and phen-3(Y16329) are both alleles at the same locus and are in the right arm of L. G. III at 2.2 map units to the left of tyr-1(Y6994).

(2) The tyrosine requiring strain No. NM160 (tyr) responds also to tryptophan and leucine (just like phen-1) and is in the right arm of linkage group I at 17.2 map units to the left of al-2.

added not to info sheet 4873

add info to 4873

1294, 1295

Not so !!

Sincerely yours

A. A. El-Eryani

Dear Ray -

I hope that you understand this and know what to do about it. Would you take care of it please? (I have sent a copy to Rowland Davis).
