

Growth rate is wild type and the character is inconspicuous in mass culture. It is distinguishable from wild type microscopically in 20-hour single ascospore colonies grown on minimal or complete (yeast extract) medium.

YOUR STOCK NUMBER FOR THIS CULTURE C-150-1500-2-A
ORIGIN OF STOCK (e.g., C-150-1500-2-A)
(for example, obtained from induced delectation with stock)

DATE OF ISOLATION (month, day, year)
DATE OF IDENTIFICATION (month, day, year)
ISOLATION METHOD (e.g., ascospore)
IDENTIFICATION METHOD (e.g., morphology, growth characteristics, etc.)
REMARKS (e.g., growth characteristics, etc.)

YOUR NAME (last, first, middle)
DATE (month, day, year)
CLASSIFICATION (e.g., yeast)
CHECKED FOR (e.g., morphology, growth characteristics, etc.)
OTHER STORAGE METHOD (e.g., none)
