

Fungal Genetics Stock Center, Dept. of Biological Sciences

This strain is microscopically compatible (forms hyphal fusions without lethal reactions) with Neurospora crassa strains of like heterocaryon genotype and will form a vigorous heterocaryon on a minimal slant. The heterocaryon may or may not grow the length of a growth tube since stability of the heterocaryon is apparently controlled by a gene or genes other than C, D, E.

YOUR STOCK NUMBER FOR THIS STRAIN IS 5117  
GENE OF STOCK # 5117 (CDE) (CDE)  
(For example - obtained from the group of stocks)
