

3+3A ♀ x +d 201; nic-2 → mi-1; nic-2 A x  
 740R 8-1a → mi-1; nic-2 A x 740R 8-1a →

mi-1; nic-2a x 740R 23-1A →  $\left\{ \begin{array}{l} \text{mi-1 - 1.2; nic-2A} \\ \text{mi-1 - 1.4A} \\ \text{mi-1 - 1.6; nic-2a} \\ \text{mi-1 - 1.8a} \end{array} \right.$   
 Growth of all very much slower than wild type & other mi mutants single ascus

This mi-1 - 1.4A is a good stock to send out - has behaved well for me.
