

APR 14 1978

Sorry to bother you again but it is getting time to assemble all the material for the NN #25
Fred

February 14, 1978

Dr. Frederick J. de Serres
Associate Director for Genetics
National Institute of Environmental Health Sciences
P. O. Box 12233
Research Triangle Park, North Carolina 27709

Dear Fred:

The cultures in question as we discussed on the phone February 14, apparently was concerned with your uvs mutants. The only information I seem to be able to unearth is what I placed into the book when I processed the cultures. The following information is all we have:

FGSC#	locus	<i>Cot = Cot-1</i>	m.t.	(your stock # ?)
2714	pan-2, al-2, cot, uvs-3		A	(74-OR254-2A) <i>ok</i>
2715	pan-2, al-2, cot, uvs-3		a	(74-OR266-20a) <i>ok</i>
2716	pan-2, al-2, cot, uvs-5		A	(74-OR260-44A) <i>ok</i>
2717	pan-2, al-2, cot, uvs-5		a	(74-OR260-8a) <i>ok</i>

If these fall into that list of cultures you are including in your forthcoming publication, we will not need anything but the deposition sheets with information. We will look forward to receiving any of the other mutants, especially with the uvs marker.

Please don't forget to send us reprints as they come off the press. It helps us immeasurably to be able to dig out information for our edification.

If the EMS meeting preceeds the IXth NIC, maybe you will be able to swing into Baton Rouge on your return trip from S.F. I will probably be in S.F. the 16th-18th of March, since my daughter should be recovering from an ear operation scheduled at the U.C. Hospital at that time. Don't know if I can get together with you, but we could give it a try if you know where you will be staying.

Thanks ever for calling. It was good to talk to you. Will look forward to your reply.

Sincerely,

William N. Ogata
curator - FGSC

THESE 4 ARE MY STOCKS OF DERIVED STRAINS OF uvs-3 AND uvs-5. 2714 AND 2716 HAVE BEEN USED IN FORWARD-MUTATION, EXPTS. THE OTHER 2 ARE JUST A HOMOZYGOTIC DERIVATIVES
