

Dear Sir: Bill: Pardon the format, but this way you'll get a quick answer.
I should greatly appreciate a reprint of your article entitled

t is OK in place of ts, though
the latter has been published. I suggest superscript (t)35, not (t)-35 which appeared in because the dash might be taken for a minus sign.
Will see you in March.

Thank you for your letter,

Best regards Bob Metzenberg

ORIGIN OF STOCK complex: mutagenesis (UV) of a constitutive, pcon^{c-2} (for example - obtained from induced in, from cross with, etc.)

PUBLISHED REFERENCE Best description of aberration is in Perkins and Barry, 1977: Advances in Genetics. Isolation and properties described in detail in Littlewood et al., Genetics 79 419 (1975)
(data regarding origin, linkage, biochemical characteristics, complementation group, etc.) temperature-conditional null in inserted segment
IF UNPUBLISHED, please indicate strain of origin, mutagen, worker, distinguishing characteristics

LINKAGE GROUP (S) & ARM II, I ; COMMENTS (special growth conditions, aberrations, heterokaryon compatibility, genetic background, complementation group, etc.) translocation (insertional) with marker. Genetic background is that of St. Lawrence-Oak Ridge.

(use additional space on back of page if necessary)
