Dear Craig:

I'm sorry to delay response to your inquiry for so long, but I've been busy and it kept moving to the bottom of the stack. I'm quite sure that the stock in question is *his-3*, but we did in fact look for mutants in *his-2* also, so I've had to trace back to some old notebooks etc. I did not find any cases where we actually had the other alleles in a *his-2* stock, so it seems highly unlikely that I would have sent one to the stock center.

Yours truly,

A handwritten signature in blue ink that reads "Clint Magill".

Clint Magill
Professor of Genetics
