Dear David:

This is in response to your letter of May 20, regarding ure-3. You have my permission to deposit in the Stock Center my ure-3 (F29) stocks in each mating type, and I would appreciate your identifying the stocks as coming from me.

I also appreciate your identifying F29 as a point mutant in LG<sup>II</sup>R, thus clearing up the confusion of my having mapped ure-3 in LG<sup>I</sup>R because of my having used my B1 allele of ure-3 that was associated with an unbeknown I-II translocation.

Sincerely yours,

H. Branch Howe, Jr.
