Dr. William Ogata
 Curator, Fungal Genetics Stock Center
 Humboldt State University Foundation
 Arcata, CA 95521

Dear Dr. Ogata:

I have enclosed following strains to be preserved in the Fungal Genetics Stock Center. Soon I am planning to send you a number of osmotic mutants and also five new nuclease mutants for your collection. I very much believe that their timely release will help other Neurospora biologists. We are also trying to send you mms-sensitive mutants.

Thanks for the opportunity. Please convey my regards to Dr. Barratt.

Sincerely,

N. C. Mishra

NCM:hes

P.S. Under a separate cover I am also sending you 15N marker mutant strains of Neurospora which are sensitive to MMS (i.e. MMS-sensitive mutants) Delange and Mishra 1977

Bill
 Here is ^{sex} more strain for you.

NCRASSA	FGSC #	Strain
05-6	3896	14-3a
	3897	56-6A
	3898	56-4
	3899	171-3
	3900	171-7

} alleles of
