

su(bal): suppressor of balloon

062

*This is Seale's
ssu-7, allele WRU7,
I believe*

ssu-7: supersuppressor-7

VI L Between ad-8 (8%) and ylo-1 (14%) (680).

Selected by (680) as coincident suppressor of the nonsense mutants trp-3(tdl40) and am(17), which may be either amber or ochre but cannot be UGA (682). Also suppresses nonsense mutants at trp-1, trp-2, and ad-3B. (681). ssu-7 shows the widest spectrum of the known supersuppressors (681). Allele Y319-37 of ssu-8, which is on IR, has erroneously been called ssu-7 in some FGSC lists and by (265).
