22ND MAY '84

Dear Craig,

This is Myra here. Reg. is away teaching a course in the Bahamas at present so he asked me, if I could send you the strains you wrote for and, to apologise to you on his behalf for him not being able to send you them himself. I've enclosed the gln-1b and mea-1 strains (we're presently rechecking the phenotype of the mea-1 strain - concurrent with sending this). Hope they reach you in time.

Barry said to say hello.

Yours,

Myra K. Dunlop

(MYRA DUNLOP)

LINKAGE GROUP (s) & ARM IVL, COMMENTS (special growth conditions, aberrations, heterocaryon compatibility, genetic background, complementation group, etc.) This strain was originally isolated in Wtype 74-OR23-1A then crossed to Wtype 74-OR8-1a. This spore with the mea characteristics which was isolated was designated the no. 1.16.

(use additional space on back of page if necessary)
