PLEASE PROVIDE COMPLETE INFORMATION

Reprints or other data relating to this deposit will aid the Stock Center and recipients of the strain.

Accession
number

SPECIES N. crassa 6678

GENOTYPE fluffy (fl)

MATING TYPE a LINKAGE GROUP(S) IIR

DESIGNATION OF MUTANT ALLELE(S) L

STRAIN DESIGNATION IF WILD-TYPE _____

YOUR STOCK NUMBER FOR THIS CULTURE BW16-2
include stock no. from other collections

ORIGIN OF STOCK true fl from FGSC#~~444~~ 45 backcrossed twice to 74ORS6a
for example - obtained from, genetic background, from cross with; or if
collected from nature, collection point, substrate and collector.

PUBLISHED REFERENCES see FGSC#45

(for any information regarding this stock)

IF UNPUBLISHED, please indicate strain of origin, mutagen, worker,
genetic background, important characteristics _____

COMMENTS (special growth requirements, aberrations, heterokaryon
compatibility, special uses of strain, etc.)

see FGSC#45

(use additional space below or on back of page if necessary)

YOUR NAME Brian White DATE 2-17-89

Additional Comments: (use back of sheet if necessary)

This should replace FGSC#~~444~~46 which segregated some additional ~~xxx~~ morphological mutations when crossed to wild type. The first backcross to wt produced a fluffy isolate which was female fertile. When this was backcrossed, it yielded only fl or wt progeny - it was from these progeny that this strain was picked. It should therefore be female fertile and free from other morphological mutations.
