

Dr. F. A. Weiss,  
American Type Culture Collection,  
2029 M. Street, N. W.  
Washington 6, D. C.

Dear Dr. Weiss:

We are sending you cultures of Gelatinospora cerealis 11244  
isolated from cereal roots in Manitoba, and of G. tetraspora 11245  
isolated from parsnips in British Columbia.

We would be very pleased to have G. autographa, A and  
B as described by Alexopolus.

Yours sincerely,

*E. Silver Keeping*

E. Silver Keeping.
