July 10, 1996

Dear Kevin,

Greetings! Please find two strains of Neurospora crassa enclosed, along with a table giving their nutritional requirements, mating type and het constitution. These strains were used in a study to be published in Genetics. Please let me know as soon as possible by email ([mysmith@ccs.carleton.ca](mailto:mysmith@ccs.carleton.ca)) the FGSC # for these strains. I can then include the numbers as a footnote to this table when I receive the galley's.

Thank you

Myron S.
