Dear Kevin:

Here are two cultures for deposit: 26 Sept 01

for A C24 my 2g. 7154. LG VII
(to replace Fgsc9)

T(VI) H637al-1; T(IV,V) R2355; T(VI,VII) MIV 86 (= "III-free")
[List under "stocks with two or more reciprocal translocations".
my 2g. 1245-67 - 1830.

Also enclosed are deposit sheets for three additional strains that should be given Fgsc nos. and listed in the catalog. These are from T. jisarua, Java, Indonesia. List P370 and P761 under N. intermedia, Indonesia. List P760 under N. intermedia mutants.

I assume that you already have cultures of these three in the wild-collection. If not, I'll dig them out here and send transfers.

FgN 48 just arrived. Thanks!

Looks good.

Have you started reorganizing the catalog, for 2002?

Best wishes, as always,
David
