Dear Kevin,

Here are three spore killer stocks that David Perkins and I have experimented with to test vegetative growth and conidial production from heterokaryons of killers and sensitives. We hope soon to have a paper ready to publish about the study.

Here is one spore killer stock that I wanted to send along with these but I may have lost it. If I can recover it, I'll send it later after I get back to North Carolina in May or June after my workout here in the Perkins lab.

Regards,
Edward
