Hi June,

Here are the numbers for the strains you mentioned.

FGSC #	STOCK #	Description
10423	B-3501	C. neoformans serotype D, MAT alpha
10424	NIH 191	C. gattii serotype C, MATa

Happy New Year.

kevin

Hi Kevin:

We are ready to send you the molecular typing reference strains of C. neoformans and C. gattii. I would like to include two additional strains that are often used by some investigators: C. neoformans B-3501 (serotype D, MATalpha, genome sequenced at UC San Francisco) and C. gattii, NIH 191 (serotype C, MATa) which is the type strain of Filobasidiella bacillispora (sexual state of C. gattii). I would appreciate it if you could assign FGS numbers for these additional two strains which will be shipped together with the other 8. I would like to have the numbers as soon as you could assign because I am going to put the FGS numbers of these strains in my molecular typing manuscript that is ready to be submitted.

My best,  
June

Dear June,

I have assigned numbers for the strains you have proposed depositing into the FGSC collection. They will not be listed on the FGSC online catalog until they are actually received at the FGSC.

STRAIN NUMBER	STOCK	REPORTING GENES
10415	WM148 / CBS10085	C. neoformans VNI, AFLP1
A/alpha 10416	WM626 / CBS10084	C. neoformans VNII,
AFLP1A A/alpha 10417	WM628 / CBS10080	C. neoformans VNIII,
