

7 foil-wrapped packages taped here,
each contained a small piece of filter
paper

| <u>Strain</u> | <u>Genotype</u> | <u>FGSC #</u> |
|---------------|-----------------|---------------|
| Del → | NRRL1555 (-) | 10429 |
| B2 → | madC 452 (-) | 10430 |
| C111 → | madB 103 (-) | 10431 |
| C109 → | madB101 (-) | 10432 |
| C47 → | madA 35 (-) | 10433 |
| C21 → | madA 7 (-) | 10434 |
| A905 → | madC 406 (-) | 10435 |

Please, find enclosed as a New Year present
a few representative strains of Phycomyces
blakesleeana. These strains have been
tested recently in my lab for mating type,
colour and photoperiodic equilibrium.
With my best wishes
