Kevin:

Greetings from S. Calif. Hope you are well & have dug out from the snow by now. I am sending you these deposit sheets. I thought they had gone to you along with those strains (Time?) but obviously not.

I have closed most of my lab now & was cleaning it up when I came across these sheets. I tried to fill them out as best as possible, but some details may still be lacking. Should have had my tech. do it while she was still here.

Best,

Stu

See you at Asiloma!
