

Dear Dr. Mc Cluskey

Thank you so much for your quick reply. I wish I knew you were at the APS meeting so that I could say hi to you.

Yes, we are depositing VCG testers.

We have tried to contact the Penn State collection multiple times but they have not replied. Dr. Geiser and Dr. Leslie told me that the Penn State Fusarium center lost the technician who took care of the collection. I am not sure if they are able to accept any isolate now.

To deposit VCG testers to the FGSC, do I need to deposit nit mutants as well as wild type?
Please advise me how I can deposit my cultures.

Sincerely

Ayami
