JUNE 1975

Going With the Wind

Kansas State University ROTC color-guards are taking part in a dignified presidential review in Memorial Stadium when a rude and ungovernable wind sweeps and swirls around the four flags turning the event into what is later described as a sort of "ROTC Maypole." Alert Kansas State *Collegian* Photographer Sam Green records the encounter.

K-STATTER

The Acker Place

By Dick Haines

It was quiet in the country. Pale gray clouds floated southeasterly; goldfinches with yellow plumage and black foreheads sang as they darted from the barn to the house. A yellow bus—Cass County Community Schools in black letters on its side—lumbered down a gravel road, stirred up a fine cloud of white dust as it rambled past Clayton Acker's house. CLAYTON ACKER was in large yellow letters (against a black background) on the mailbox. A white, two-story frame house with eleven curtained windows facing south, was set like a steadfast rock. Barns and sheds were painted brick-red; discarded tractor tire shells were used for flower pots; a rolling lawn had been cut and trimmed; and a discarded black and white washing machine with geraniums planted in it was unobtrusive in a corner where two neatly shaped hedges met. Everything was newly painted; tools were carefully hung; doors were properly latched.

Clayton Acker was not at home. He was recuperating from a cataract operation and was staying with his son, Duane, in Lincoln.

The Acker farm is located in Iowa, an Indian word meaning "this is the place." It is not far from Atlantic, a bustling town of 7,000 that was named because it was believed to be halfway between the Atlantic and Pacific oceans.

The lush land is located on a rolling prairie, marked with long wave-like elevations of gentle slopes. It is where, 44 years ago, Duane Acker began to grow toward manhood. It is where he worked, where he learned, where he played.

Two enormous trees are in the front yard. The one nearest the road is more than 100 years old. It might even be 200.

"What kind of tree is that in the Acker's front yard?" a visitor asked a neighbor on the west.

"Oh, that's a maple. Sugar. All our elms died. Dutch elm disease killed 'em," Albert Thomas Jr., said as he jammed large, thick from hard work fingers into the pockets of his union-made Big Smith blue and white hickory striped overalls.

"You know Duane?"

"Yes, but I don't know him well. I know his dad. Clayton is quite an old character. His wife died last year. She was born on that farm. It was hers. I think Duane was born there, too."

A dog barked.

"You see that creek down there?" Thomas said as he pointed south. "Clayton once told me he had a little island where all his sheep would run when it started to flood. And it flooded all the time. As a matter of fact the sun could be shining and it would flood. That's why they call it Troublesome Creek."

He looked back at the Acker place.

"You know," he said, in his loud, out-of-doors voice, "we got the best dirt in the whole world. I could go to the Nile in Egypt and I couldn't find better land than we have right here...."

As the visitor turned and started to leave, Thomas smiled broadly and said he'd read in the newspapers about Duane's appointment as the new president of Kansas State University. "Forty six thousand dollars," he boomed good naturedly, "ain't that terrible?"

Two of Duane's uncles live in town; a third lives near Wiota, a small community nearby.

Clarence Acker moved to a new but modest home at 404 Laurel. His name, in large letters, is attached to the house near the front door.

He was taking a nap.

"Come on in," he said, as he slowly got out of his chair and pulled an aluminum cigarette case from his pocket.

"I farmed around here for 35 years on my grandfather's place. We retired and moved to this house about three months ago," he said. An unfiltered Camel responded to his heavy drag.

"Why does the family pronounce the name AUK-er?"

"We're German decedents," he said, "and in German the name is spelled Aucker, Aeker and Acker. But in German it is pronounced like the word 'acre.' It means an acre of land."

"What do you think about your nephew, the new president?"

Shifting a toothpick that bobbed in his lips, the uncle said, "Aw...he was always up and coming. All he's got he's earned himself. I can hardly believe he's gone as high as he has."

Uncle LeRoy lives a few blocks away. At 505 Olive. His name, in huge letters, can be easily spotted from the street.

Inside his home large African violets were blooming and a water-loving, light-green fern arched on a nut-brown wooden stand.

"We farmed for 37 years before we had our sale in 1965," he said.

Behind him on the wall is the Acker crest. He got up, walked toward a drawer, and produced a Halbert's Coat-of-Arms historiography.

"I think I'm the only one in the family who had this researched." The name Acker, the paper says, means "one who lived on a homestead of one acre."

The City of Atlantic is hilly. It looks like a miniature San Francisco. There are pastel gray, pink, blue and white wooden houses with black screens, hanging plants, attics, breezeways, sleeping porches, separate garages, wide sidewalks.

At the south end of town, Joe O Connor lives in a magnificent home with a large picture window overlooking the Atlantic Golf and Country Club. He had just finished a round of golf and was taking a shower.

"He has a meeting tonight," said his wife Janet.

"Do you know Duane Acker?"

"I sure do," she said. "I was his third grade teacher."

She left the room, came back and said, "Joe will meet you at nine o'clock in the morning at his office. Is that okay?"

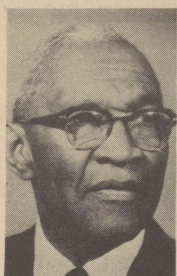

In the meantime, several K-Staters and friends in Atlantic were asked to comment upon the Acker appointment.

"I think he'll be all right," said Richard A. Robertson '63 who was graduated in feed technology. "He is progressive as well as an aggressive individual."

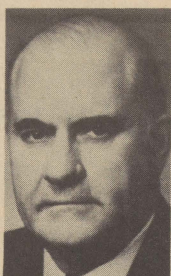

Walnut Grove Products, a firm that manufactures animal feeds and has assets exceeding one million dollars, is where Duane Acker worked during the summer of 1951. Donald Postlethwaite '58 is Walnut Grove's director of production.

"We had a meeting last night," he said, "and somebody said the K-State job is just training ground for Iowa State. There were two guys at our meeting from Iowa State and they just smiled. We at Walnut Grove are really happy about Duane's appointment. He'll do a fine job. We'll help him out in any way we can. He's got

Campbell

Peltier

Trotter

3 Outstanding Alumni Honored

Three outstanding Kansas State University alumni have received the "University Alumni Medallion"—highest award given by the Kansas State University Alumni Association.

They are Dr. John L. Campbell of Chicago, veterinarian; Admiral Eugene J. Peltier of St. Louis, former consulting engineer; and Dr. Virginia Yapp Trotter of Arlington, VA, assistant secretary of education in the Department of Health, Education, and Welfare.

Recipients are selected for outstanding careers, contributions to society, and service to Kansas State University.

Dr. Campbell, a 1918 KSU graduate in veterinary medicine, studied at Tuskegee Institute in his native Alabama. He was influenced by Booker T. Washington, famed educator. Later, Dr. Campbell was a protege of George Washington Carver, Tuskegee Institute scientist, and helped him develop a variety of uses for soy beans, peanuts, long staple cotton, and sweet potatoes.

Dr. Campbell taught at Voorhees Industrial School in South Carolina and later worked as a veterinarian in the U.S. Department of Agriculture. He worked there nearly 40 years and retired in 1958. During that time he helped form the Federal Credit Club which later became the Bureau of Animal Industry Credit Union.

In 1924, Dr. Campbell helped found the Church of Good Shepherd, United Church of Christ, in Chicago. He was superintendent of the church school and was chairman of the board of deacons.

He also spent 40 years in financial leadership of the Morgan Park Savings and Loan Association, organized to furnish capital for home ownership in the black community.

Admiral Peltier was graduated from KSU in 1933 with a degree in civil engineering. He joined the Kansas Highway Commission in 1940.

He joined the Navy and after 22 years of active duty became Chief of the Bureau of Yards and Docks and Chief of Civil Engineers with the rank of rear admiral. He was the second youngest to be appointed to that responsibility to maintain a \$20-billion world-wide plant.

In 1962, he joined Sverdrup and Parcel and Associates of St. Louis, one of the nation's largest consulting engineering, architectural, and planning firms. He retired as president and chief executive officer.

He is a past national president of the Society of American Military Engineers and the American Road Builders Association.

The admiral is a director of the St. Louis Regional Commerce and Growth Association; chairman of the Midland District of the Boy Scouts of America; member of the advisory board of St. John's Mercy Hospital; and active in civic affairs.

He was awarded an honorary doctor of laws degree by KSU in 1961.

Dr. Trotter majored in home economics and received a degree in 1943. Later she earned a master's in 1948 from K-State, and a doctorate in 1963 from Ohio State University. She returned to KSU in 1973 for an honorary doctor of science.

Dr. Trotter, who began her professional career at the University of Utah, later joined the faculty at the University of Nebraska and was in charge of family economics. In 1955 she became head of home economics at the University of Vermont.

She returned to the University of Nebraska where she was director of the school of home economics and was appointed dean in 1970. Two years later she was named vice chancellor for academic services, the first woman to hold this position in any of the nation's land-grant schools.

Last year she was appointed assistant secretary for education in the Department of Health, Education and Welfare, and was the first woman to hold this government job in education.

Dr. Trotter has helped in the rehabilitation of physically handicapped persons with homemaking responsibilities and in international home economics higher education with emphasis on programs in Turkey and Colombia.

She has served as vice president of the American Home Economics Association; is a member of the executive committee of the President's Committee on Employment of the Handicapped; has been co-chairman of the U.S. Department of Agriculture's National Research Task Force for Human Nutrition; and is a member of the board of directors for human ecology at Cornell University.

\$25,000 Goes to McCain Fund

Kansas State University alumni have responded to a mailed solicitation for funds for the Dr. James A. McCain Commemorative Scholarship Fund with early contributions of \$25,000.

"The sum represents contributions by 350 alumni in amounts ranging from \$5 to \$500," said Larry Weigel, associate director of the KSU Endowment Association.

"An appeal was sent to alumni asking their support and we are now receiving alumni gifts daily. We expect the alumni total to grow rapidly in the next three weeks."

Weigel said the \$25,000 in alumni gifts has pushed the commemorative scholarship fund effort to \$110,000. This total includes major gifts announced earlier by Hallmark Cards, First National Bank of Manhattan, and by R. M. Seaton, general chairman of the campaign.

The Acker Place

a good reputation here."

Robert Stuetelberg is not a K-State graduate but has known the Ackers a long time.

"What I like about him is this: Once we had a meeting up in northern Iowa. When he talks to farmers he talks their language; and when he talks to doctors he talks their language. This meeting was for farmers. And they loved him."

Stuetelberg said his son went to school at Brookings, South Dakota, where Acker was dean of the college of agriculture and biological sciences. "Duane and Shirley invited us to their house for dinner after the football game. They were a good host and hostess."

Joe O Connor's office was toward the back of First Mid America Inc., a New York Stock Exchange firm on Atlantic's main business street. He wore a blue searsucker sport coat, dark blue pants, black loafers. A copy of the Wall Street Journal was on top of his desk along with a Victor calculator.

Joe rose from his chair, smiled and extended a hand. His handshake was firm. He was tanned, rested after having returned from a vacation in Arizona. He was superintendent of schools and a coach at Wiota where Duane went to school. Now Joe deals in real estate, stocks and bonds, nursing homes, farms.

"Duane Acker? Sure I know him. I've known him since first grade. In fact...even before that."

"What can you tell me about him?"

"Duane was outgoing. He was a real sharp student. He was the most capable student I ever had in 16 years. He was an all-around student. Duane was small. Size was against him. But by being sharp it made up for the difference in size. He was quiet, humble, but was well liked by the students. He always gave a helping hand."

Coach O Conner said Duane brought the ball up the floor when he played basketball and was an infielder during baseball season.

"What were his folks like?"

"Listen...there was nobody more interested in their children than the Ackers. Duane, however, was the type of boy who disciplined himself. His folks didn't have to. He was the same way at school, too. He was the leader, the one doing the right thing."

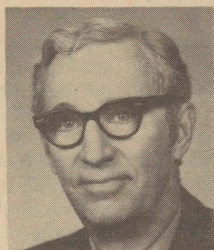

Joe was with Walnut Grove for 16 years and was president when he left the company to go into business on his own.

"One more thing," he said. "Years ago a lady set up a scholarship. Ralph Keller and Duane Acker pressed each other all the time. Both had high I.Q's. It was always Ralph and Duane. Duane got the scholarship. We were really proud of him. From a small school like Wiota...."

They raise corn at the Acker place. Fat, healthy ears that feed livestock, which helps feed a nation.

The Ackers also raised a boy who would become president of the nation's first land-grant university, a seventy million dollar organization, with nearly sixteen thousand students, some three thousand faculty and staff, a three hundred and fifteen-acre campus, and four thousand more acres used for experimental work in agriculture. □

Potter Elected Alumni President

Thomas M. Potter '37, a Wichita banker, has been elected president of the Kansas State University Alumni Association.

He is a senior vice president for the Fourth National Bank and Trust Company.

Potter was elected in a mail ballot sent internationally to more than 16,000 K-State alumni. He will serve as president two years.

Five new directors, elected for three-year terms in the same mail ballot conducted through the office of H. Dean Hess, director of alumni relations, include:

Mary Hewson '48 of Larned; Kathryn M. Hill '62 of Redondo Beach, CA; John A. Hineman '44 of Dighton; Don Matuszak '59 of Springfield, MO; and John K. Vanier fs '51 of Brookville.

Potter also is head of the correspondent banking division and is a commercial loan officer.

Current president, James C. Richards '34 of Emmett, will remain on the board of directors for one year.

Retiring board members are Mary Wurster '57 of Mission Hills; Raymond Bert '39 of Sedgwick; Nancy Gatz '54 of Pratt; Dick Nichols '51 of McPherson; and Richard Wells '52, '56 of Wichita.

Assistance Comes from Legislature

Here are some highlights from the 1975 session of the Kansas legislature, with specific emphasis on increases in appropriations for Kansas State University:

- \$2.7 million to raise faculty salaries an average of 10 per cent.
- \$768,000 for salary increases up to 12 per cent for classified employees.
- \$1,011,754, representing a 15 per cent increase in non-salaried support for teaching and research.
- \$542,000 for new teaching positions to accommodate enrollment increases.
- \$100,000 increase in library support.
- \$300,000 increase in support for agricultural research.
- \$1.2 million to construct a new dairy research center.
- \$5,380,000 as the final increment for construction of a new \$15 million veterinary hospital and clinic.
- Architectural planning funds for new general classroom and new plant science buildings.

Of special interest to students was a \$30,000 increase in funds to support women's intercollegiate athletics, a \$168,775 increase in the student payroll, and creation of a student advisory council to the Board of Regents.

A Future Miss Kansas? >

A winning smile is shown by Rochelle Forsberg, Lindsborg, winner of the Miss Manhattan-K-State Pageant. The black-haired and blue-eyed coed of Swedish descent is a Kansas State University freshman in social work and a member of Alpha Xi Delta sorority. She also won a \$300 scholarship and the right to compete in the Miss Kansas Pageant this summer in Pratt.

She Makes the Front Page

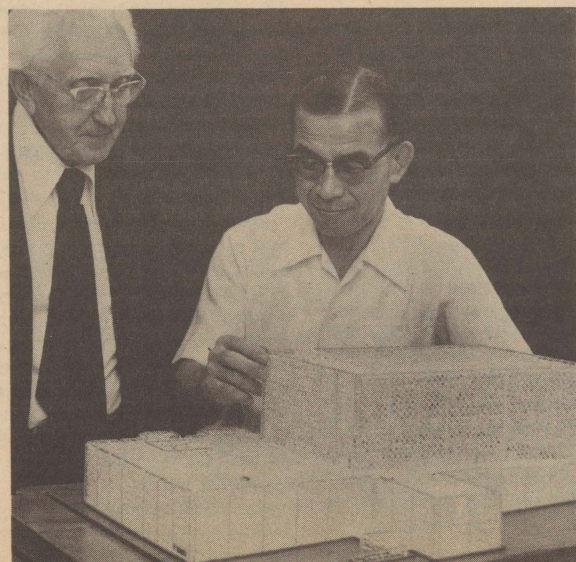

Every journalist dreams of some day having a by-lined article on the front page of a major newspaper.

That dream came true for a 24-year-old Kansas State University graduate student in journalism, Nancy Keebler.

As a fellow in the KSU mental health-mass communications program, Miss Keebler has been pursuing a two-year program for a master's degree. One of the requirements of a fellow is a stint as an intern in a journalism assignment where the intern applies journalistic skills to interpreting mental health-related subjects.

Miss Keebler signed on this semester as an intern for *The National Observer*, Washington, D.C., and the top story in the April 12 issue, is her by-lined article, "When a Child Might Die," which explores "the specter of death hanging over the very young."

Writes editor Henry Gemmill in his "Post Script from the Editor" column in the same issue: "It's a realistic article showing how families can be ripped apart. Yet a useful one, telling how some can rise above that. Indeed, Nancy did not find the reporting task depressing; she says it was beautiful to discover the courage—and even joy—of youngsters and parents."

An All-Glass McCain Auditorium

Pointing to a feature of his work on the intricate glass replica of the McCain Auditorium is Mitsugi Ohno, renowned glassblower for Kansas State University. With him is Dr. A.B. Cardwell, professor emeritus of physics, who commissioned Ohno to do the work. The glass replica was a surprise gift to KSU President James A. McCain, for whom the University Auditorium was recently named. President McCain will retire June 30, after 25 years of service to KSU.

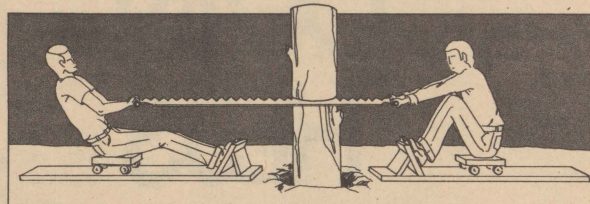

Tripp Has a Better Idea

A way to harness human power to saw lumber in underdeveloped countries short of water, electric and wind power all started when a K-State mechanical engineering professor with a consuming curiosity about how things work had a tree stump he needed to saw off close to the ground and had no one to help him on his two-man cross-cut saw.

Dr. Wilson Tripp found a rope and tied one end to the far end of the saw and the other end to a nearby tree; then set about sawing horizontally through the stump by himself.

"I found that if I produced a sort of flat, oval, rowing motion, tightening the rope when I was ready to pull the saw toward me and then slightly easing the blade away from the tree to free it so I could push the saw back through, that I could saw through the stump in jig time," he said.

With his task completed, Tripp thought about the tremendous leverage which oarsmen get because the seats on which they sit roll back and forth (their feet are anchored), permitting the

oarsmen to use only their arms, but also back and leg muscles, to power oars. Tripp soon found himself applying rowing power to sawing down trees or ripping logs.

He had envisioned a setup in which two persons would saw lengthwise through a log placed in a near vertical position, but his students felt the problem of handling heavy logs was too serious, and they thought it would make more sense to have the logs placed on a carrier of some kind that would move on a track. Then by building a giant hacksaw with the blade at right angles to the saw, the persons sawing could slab boards off the top of the log while they remained comfortably located in their sliding seats and the log moved by them.

H. DEAN HESS

Les temps heroiques sont passes. When that saying was written in about the middle of the 1800s, here's what the author meant: "The heroic times have passed away."

Based upon what I learned only recently, I don't believe heroic times are gone and will prove it with a couple of true stories.

Several weeks ago Betty (Hinkhouse) Aubel, a former K-State student who is married to Bill Aubel '50 of Hays, was driving near McPherson when an approaching motorist weaving into her lane forced her car off the road. It slammed into a guard railing, became airborne, was hurled into the dirt, and rolled down an embankment. Flames had already engulfed the back seat and rear of the car.

Good, Young, Raw Football Talent Ready

Ellis Rainsberger '58, a two-time all Conference performer for the Wildcats in the mid-50's, enters the KSU head job with a wealth of experience. After graduation from K-State, where he was an academic all-American and the captain of the 1956 and '57 Wildcat teams, Ellis became an assistant coach on the LaSalle-Peru (Ill.) High School staff. After serving one year there, he moved to Drake University as an assistant for three seasons. He was named head coach at Washburn in 1962 and in his third and final campaign there, he guided the Ichabods to an 8-1 season—the team's first conference championship in 31 years—and an eighth-place ranking among the nation's small colleges. Rainsberger served as linebacker coach at Kansas in 1965 and from there became the head coach at Southern Illinois the next season. After one year there, he spent the next six years as both offensive and defensive coordinator at Illinois. He became the offensive coordinator and head recruiter at Wisconsin in 1973 and left there to become the KSU head man in December of '74. Rainsberger's teams are known for their hard-nosed play.

KSU's first-year coach Ellis Rainsberger has a wealth of good, young raw talent on hand. Three potentially great sophomores will be in the quarterback picture. They will have the luxury of performing behind a veteran interior line. The running back slots are a bit of a question mark heading into spring drills but there are no fewer than six candidates who have ability.

The offense:

Backfield: Fullback Roscoe Scobey is the lone returning full-time starter in the offensive backfield but there are several performers who logged extensive playing time last season. Scobey, who led the Cats in rushing, will be pushed hard by lettermen Regan Steiner, a part-time starter, and James Couch. L. T. Edwards, who drew a starting assignment in a couple of games last year, is a leading candidate at the tailback post. Letterman Carlos Whitfield, who had an excellent spring game in 1974, and Kerwin Cox, a dangerous kickoff returner, are other tailback prospects. Cox, a frosh from

Oklahoma City, rambled for 92 yards in KSU's upset win over Colorado last fall. It is hoped that two of the aforementioned running backs will emerge in spring drills; none were consistent during the past campaign. Three sophs with promise and a junior letterman will vie for the quarterback duties. Arthur Bailey, who saw starting duty as a freshman last season, is the most experienced of the crop. Joe Hatcher, who was impressive on the junior varsity in '74, is touted as the best passer of the four candidates. He is a tailor-made drop-back style QB. The third soph, Larry Crawford, is a transfer from Southern Methodist. Junior Tom Merrifield rounds out the list of hopefuls for the signal-calling job. If Hatcher or Merrifield should win the starting assignment, Bailey and Crawford may be moved to a wide receiver or defensive backfield slot. They are both excellent football players and are too valuable to put on the bench.

Receivers: Stan Ross is the top returning pass catcher. He was not a starter last year but he was considered a regular. He joins lettermen Kirk Darland, a hometown product, and Alonzo Wade, who is considered a big-play man. Coach Rainsberger's staff plans to utilize a wingback and split receiver in their offensive setup, which will most likely be a Power-I. The 'Cats are in great shape at tight end where starter Tom Winchell and letterman Dave Chambliss return.

Line: KSU returns both starting guards and its first-team center from last year's club. Tim Wasemiller (6-2, 235) is another one of the several fine centers in the Big Eight. Returning to play on each side of him are guards Mark Zier (6-5, 237) and Floyd Dorsey (6-3, 216). Zier's great size could allow him to move to tackle, where the ranks are shallow. Dorsey, who started as a freshman, could be KSU's finest offensive lineman. The only other letterman available for duty is backup center Mike Roberts (6-2, 230). Newcomers who will be fighting for interior line berths are Chris Haag (6-5, 270), a transfer from Southern Mississippi, and sophomores Glenn Plotkin (6-1, 230) and Jim Rogers (6-4, 240).

Kicking: The Purple Pride lost one of the top punters in the U.S.—David Spare—via graduation. However, David Cheves, who led the national junior college ranks in punting two straight years before transferring to KSU last season, is on hand. Cheves handled the place-kicking chore last year, adding 35 total points to the Wildcat cause. He will be the jack-of-all-trades in the kicking department this year.

Kansas State has the healthiest linebacking situation in the Big Eight. While most teams must resort to finding new backers, KSU has four quality performers there. The Cats are also in good shape in the line but the secondary has almost been completely depleted. That is the main area of concern.

The defense:

Secondary: Cornerback Rocky Osborn is the only bonafide returning starter. However, Paul Smith has played a lot of cornerback and Jim Lembright a lot of safety for the Wildcats. They are considered part-time starters. Three individuals who lettered as sophomores last season will be in the battle for the four spots. They are Dennis Frazee, Marvin Switzer, and John Andrews. Frazee, a rangy 6-2, 200-pounder, is one of the top monster candidates. The real surprise in the defensive backfield could be redshirt soph Henry Lige who was forced to sit out last season after undergoing surgery to repair a knee injury. Quarterback candidate Larry Crawford garnered playing time at safety while at SMU.

Linebackers: The Cat linebackers are big, mobile, and devastating! Two-year starters Carl Pennington (6-0, 228) and Theopilis Bryant (5-10, 228) both return. Gary Spani (6-2, 207), a freshman who gained Big Eight Player-of-the-Week honors for his outstanding performance against Missouri, is also very much in the starting picture. Letterman Denny Gragg (6-1, 215) and sophomore-to-be Tom Price (6-1, 228) provide even more depth. It is believed that one or two of those five will be moved to other positions due to their tremendous abilities. Spani has the talent to play in the secondary.

Line: Roy Shine (6-2, 225) will again anchor the defensive line from his nose guard

Dr. Victor D. Lundstrom, a 1951 K-State graduate in veterinary medicine from McPherson, later told a reporter from the McPherson *Sentinel*:

"I was coming home from an emergency call when I saw a car that appeared to be parked on the grass. As I got out I saw flames coming from the back seat. I radioed to my wife and then ran to the vehicle.

"I saw a lady's foot sticking out of the front and flames in the back seat and all around the grass."

Lundstrom leaped over two fences and raced across a stretch of ground about three blocks long. When he arrived she was semiconscious.

"I couldn't get the door opened and had to pull her out through the window. By that time the front seat was all in flames. I figured I had about two to three minutes from the time I was in the car until I got her out.

"I was really upset by the number of people who were closer to the car than I was that didn't do anything about it. People were driving by and could see it. They would slow down and then drive right on by.

"Nobody wants to be first, I guess."

He pulled her to a nearby fence and away from the fire.

"I had done all I could do."

Then, during the Memorial Day weekend, heroic action by five K-State students and a professor may have saved the lives of three persons from Nevada.

The K-Staters were returning from Yosemite National Park where they had taken part in a K-State Union-sponsored backpacking trip.

About ten miles west of Carson City on U.S. Highway 50, a car passed them, went off the road, and overturned.

Despite danger from gasoline spilling from a ruptured gas tank, the K-Staters rescued a man with a broken arm trapped inside the car, and administered first-aid to the others who were wandering in the desert.

"If it had not been for the assistance and cool-headed reactions of the students, the three might be dead now, rather than injured and hospitalized," said Dr. Robert Poresky, an assistant professor of family and child development. "The students certainly are to be commended for their courage in giving valuable and needed aid in the emergency."

The students were Pat Robinson of Cedar Point; Vicky Ruthrauff of Moran; Julie Lamborn of Lansing; Jim Banks of Lincoln, NB; and Edward Hall of Overland Park.

position. He was the most consistent defensive player for KSU last fall. Starting tackles Rickey Gray (6-3, 252) and Alton Carson (6-1, 237) will also be back but they will have to fight hard to keep their starting roles. Hal Batdorf (6-2, 230), a starter in 1973, was also a regular in '74 until a knee injury forced him to the operating table in mid-season. A. J. Smith (6-5, 261), a junior college transfer last year, and Chris Malmgren (6-3, 230), a freshman in '74, could be pleasant surprises to the new coaching staff. They should be two top prospects in 1975 after a year's exposure to major college football. The ends are well-fortified with two-year starter Lou Wegerer (6-1, 215) and part-time starters Vic Chandler (6-1, 202) and Perry Viers (6-2, 206) back for duty. The latter two have outstanding potential. Two-time letterwinner Roger Stucky (6-1, 218) and promising newcomer Randy Lorenzen (6-2, 215) provide even greater depth.

Kansas State should have much better depth this year, something that was lacking last season. Thirteen starters return, but Coach Rainsberger has indicated that no player is guaranteed a starting berth. "I do not plan to evaluate individuals from last year's films," states the new head mentor. "I want to give everybody an equal chance in the spring." He should be happy with what he sees—there are several talented young players. On offense, the interior line is experienced and a topnotch quarterback and two good running backs should rise to the top. On defense, linebacking is solid, the line is in fine shape barring serious injuries, and the secondary is a question mark. New faces will have to develop fast in the four non-Conference tilts before the Cats open rugged Big Eight play. Talent may just help KSU make up for the inexperience at the skill positions. If that is the case, the Purple People can look for brighter Saturdays in 1975.

Outstanding players to watch: Carl Pennington (lb), Roy Shine (ng), Tim Wasmiller (oc), Floyd Dorsey (og), Gary Spani (lb), and Vic Chandler (de).
